Profile

Senior full-stack developer and software architect with over 12 years of business experience in agile teams (SCRUM, XP). Dedicated and committed to guiding and contributing to technical teams and delivering robust solutions using modern technologies such as PHP, .NET (C#), JavaScript, and iOS (Swift and Objective-C). Well used to be given a great deal of responsibility and managing projects from a technical perspective.

Experience

Consultant assignment, GK Värmdö, Stockholm, Sweden — 2015
Created a flexible time reporting tool as a charity project for a gymnastic organization using Django, Python and simple Bootstrap HTML.

Environments:
Python, Django, Bootstrap, JavaScript

Consultant assignment, Isotop, Stockholm, Sweden — 2014-2105
Developed a new e-commerce web site for the phone service provider 3 in Denmark. Was part of SCRUM team of 4-7 people and assisted in designing and implementing a scalable solution based on EPiServer and .NET. I coded a big part of both backend and frontend and was responsible of introducing new developers to the project. The project was much focused on usability on mobile platforms (mobile first) and a down-scaled checkout process. Business rules had to be rethought and simplified.

Environments:
C#, .NET, EPiServer CMS 7.5, RavenDB, SQL Server 2014, Windows Server 2012, StructureMap, RabbitMQ, service bus, TeamCity, Octopus Deploy, BackboneJS, GruntJS, Handlebars, Less, NodeJS, Subversion, DIBS Payment

Consultant assignment, Wonderwall, Stockholm, Sweden — 2014-2015
Built a new e-commerce web site for an art retailer in Sweden. As the sole developer of the project I planned and implemented the work of a new solution using WooCommerce and Wordpress. Apart from the web shop I also developed a royalty tool to calculate the earnings for each artist.

Environments:
PHP, Wordpress, WooCommerce, Apache, Linux, Git, MySQL, Dibs Payment

Employee, Isotop, Stockholm, Sweden — 2010-2014
Isotop is a technical digital agency where I was recruited as a senior developer. I played a big part in many large projects. I was mostly given the responsibility to lead teams from a technical point of view and to communicate the technical aspects in projects with the customers. During my four years at Isotop I grew much stronger at planning and designing and was also introduced to many new technologies.

Examples of projects:

Nobia - Europe's leading kitchen specialist
Environments: .NET, JS, EPiServer

SOS Barnbyar - Swedish SOS Children's Villages
Environments: PHP, JS, Amazon cloud services, e-commerce

Svenska Turistföreningen - Accommodation provider in Sweden
Environments:.NET, PHP, JS, EPiServer

Sveriges Radio - Sweden's national publicly funded radio broadcaster
Environments: iOS, Objective-C

Consultant assignment, Handelsbanken, Stockholm, Sweden — 2009-2010
Developed internal banking tools for one of the major Swedish banks using .NET. Also implemented index rate tools for the capital market section.

Environments: .NET, EPiServer, Windows Forms

Consultant assignment, Sportnik, Stockholm, Sweden — 2009
Sportnik is a sports community and team administration site built on PHP and Zend Framework. In a team of 3-4 people I worked as the sole developer implementing new features such as a time reporting tool and a calendar system but also bug fixes and other maintenance.

Environments:
PHP, Zend Framework, Git

Consultant assignment, Streamio, Stockholm, Sweden — 2009
Streamio is video publishing service. I was given the task to develop a dynamic statistics tool that quickly could generate reports from giant amounts of data.

Environments:
.NET, MySQL

Consultant assignment, Motorola, Turin, Italy — 2008
As a sub contractor for Symbian, London, I was hired as a software integration specialist and worked in the integration team in Turin helping out pushing out new baselines and assisting the team with testing and debugging.

Environments: C++, Symbian Tools, Perl

Consultant assignment, Sony Ericsson, Stockholm, Sweden — 2006-2008
Worked as a software integrator with the team in Stockholm with testing and debugging. Initiated the team's first automatic test suite.

Environments: C++, Symbian Tools, Perl

Employee, Blocket, Stockholm, Sweden — 2006
Sweden's biggest buy and sales-market. Wrote my thesis work about indexing algorithms and developed a static mirror site generator. Also worked with the normal development team using extreme programming.

Environments: PHP, C, MySQL, PostgreSQL, Linux

Education
Royal Institute of Technology (KTH) — Bachelor of Science in Engineering, Degree Programme in Computer Science, 2006

Hawaii Pacific University (HPU) — Abroad program, 2003
